

Custom Engineered Agitation Solutions

The MixPro™ 'GTC' series of top entry gear drive agitators provides customers with a robust, reliable agitation source for high production industrial environments. The durable non-proprietary reducer utilizes in-line cycloidal gearing which is designed exclusively for abusive applications. Our popular 'GTC' series mixer utilizes process matched wet ends for optimum agitation solutions.

The ruggedness of this unit has proven itself time and again in abusive applications, consequently minimizing downtime while maximizing productivity.

This established MixPro™ design is widely recognized by industry as a leader in top entry agitation equipment.

Built to handle the toughest environments MixPro™ agitators have proven themselves time and again in high production manufacturing environments where quality and performance are paramount. Our quality assurance process tests every mixer to withstand the harshest conditions and perform to specification.

Features & Benefits

- Compact, in-line cycloidal gearing of the non-proprietary reducer provides for single reduction ratios up to 119 : 1.
- Reducer design can withstand 500% shock load on the output shaft and gearing.
- At any time, over 2/3rds of the torque transmitting "teeth" are engaged for power transmission.
- Transmission components are of 52100 high-carbon chromium steel which is through hardened and tempered to Rockwell C63.
- Gear housings are manufactured from high quality cast iron
- Output shaft is manufactured from high grade 1045 steel

Applications

Pulp & Paper

- Stock Prep Systems
- Recovery Systems
- Coating Systems
- Effluent Treatment

Mineral

- Precious Metals (gold & silver)
- Base Metals
- Effluent Treatment
- Cyanide Destruct

Non-Metallic Minerals

- Clay
- Calcium Carbonate
- Titanium Dioxide

Chemical

- Paints & Pigments
- Edible Oil
- Starch
- Petro-Chemical
- Alcohol Production
- Building Products

Wastewater/ Water Treatment

- Flocculation
- Chemical Blending
- Flash Mixers
